

# Learn. Do. Transform.

FOR YOU. FOR YOUR BUSINESS.

Learning  
& Development  
Programme

# Sustain ability to learn more

We believe you should never stop learning. So while we are always seeking innovative ideas, we are also committed to sharing knowledge and building skills to meet your needs through our learning & development programme.

Our learning and development programmes are designed to engage businesses and employees at all levels, to give a better understanding of sustainability in the built environment.

From bite-sized learning accessible on the move, to deep immersive training on live projects, you can increase your knowledge about sustainability. You will leave ready to apply your learnings to support best practice implementation on your own projects.

You can be sure we practise what we preach too. All of our courses are carbon neutral to reduce environmental impact.

Please note that the Gold leaf members have 5 free places to the face to face courses, make the most of them before they expire.

## THE UKGBC L&D PROGRAMME INCLUDES:

### LEVEL 1 Raising Awareness

Learning how and when you want to

### LEVEL 2 Building Knowledge

Peer to peer learning

### LEVEL 3 Developing Expertise

Immersive and practical learning

### LEVEL 1-4 Driving Change

Members learning Bespoke

LEVEL

# Raising Awareness

## GREEN BUILDING COURSE MAIL EVERY 4 MONTHS

Get to grips with what sustainability in the built environment is all about. With a series of easy to read emails, Course Mail is delivered online, on-demand, and is accessible on the move. Suited to busy professionals with little or no previous knowledge of sustainability, topics are delivered when and where it suits you.

## E-LEARNING MODULE AVAILABLE NOW

This Sustainability Essentials module provides the ideal introduction to understanding sustainability in the built environment. As an interactive module, it packs plenty of sustainability information into just 60 minutes. If you work in the built environment, have little or no sustainability knowledge, this is the course for you. You will learn the essentials, how business is responding, and how sustainability relates to your specific role.

The UKGBC eLearning module can be provided at a modest fee for upload to your own LMS, contact [learning@ukgbc.org](mailto:learning@ukgbc.org)

"I've really enjoyed the inter-disciplinary mix and the pan industry perspectives in the group through supply, manufacture, design, install and construct expertise."

Stuart McArthur  
Sir Robert McAlpine

# Building Knowledge

## INSIGHTS & INNOVATIONS WEBINARS EVERY 4 MONTHS

Busy professionals working in the built environment can now benefit from a series of one hour webinars with leading experts in sustainability. Covering the latest research, emerging technologies and best practice, you can pick and choose those relevant to you. They are downloadable and accessible on the move, so you learn when and where you like. Or join live to interact and engage with experts and peers.

## FACE TO FACE LEARNING EVENTS MONTHLY

Learn from others' experience in this series of courses, workshops and site tours. If you have some sustainability knowledge, you can delve further and discover how to put that knowledge into practice to deliver sustainable outcomes for your business. It's a great way to get fresh insights in an engaging and lively environment where you will also have the chance to chat through ideas, information and best practice with peers.

"I listened to nearly the entire Innovation series. I found it immensely enjoyable. I work as a sustainability practitioner and its easy to focus so much on the many complex issues in front of us that we don't necessarily explore what is happening at the edges of sustainability or in related sectors. I might bookmark an article and then never get around to reading it but the format was accessible and I'm glad I signed up. The topics seemed both relevant and interesting and touched on a lot of diverse areas. The level of participation was good too – the conversation around the topics was lively and brought an extra dimension."

# Developing Expertise

## SECOND NATURE LIVE IMMERSIVE PROGRAMME ANNUAL

What better way to learn than to be involved in a live project? This exciting new programme offers just that, as you and a network of peers solve sustainability challenges on a real-life development. Previous sustainability knowledge is not needed - you will learn 'on the job' how to apply, test and solve an array of sustainability issues, benefitting from guidance, tools and best practice from our experts. The knowledge, skills and confidence you develop can then bring sustainability to your future projects and improve sustainability in your business.

## MASTERCLASSES MONTHLY

Our Masterclasses offer sustainability professionals an arena to explore some of the key challenges, focussing on UKGBC's priority issues of Climate Change, Resource Use, Nature and Biodiversity, Health and Wellbeing, and Socio-Economic Impact. You will leave the masterclass with a wealth of resources, innovative approaches and strategies, and clear insight on how to implement them successfully.

# Driving Change

## BESPOKE FOR MEMBERS

Members can now benefit from an enhanced bespoke learning and development programme, meeting needs at an organisational level. We can incorporate any of the previous levels of learning and create a bespoke programme tailored to your specific needs.

These tailored learning opportunities include:

- Relaxed, informative 'lunch and learn' sessions
- Targeted on-site learning days
- Leadership workshops at your workplace
- A full sustainability learning framework, tailored to your business

AWARD  
WINNING

"The UKGBC's elearning course has provided a great platform for us to develop a bespoke introduction to sustainability training module - so straight forward that we are considering rolling it out globally. It has been great to work with the team on this project."

Anita Mitchell  
Head of Sustainability - Europe  
Lendlease

"From a participant perspective, the programme is very well run and organised with lots of support. The workshop I attended last week was really insightful and it was great to meet like-minded people from a variety of backgrounds to really get conversations going."

Fran Silcocks  
Sustainability Officer, Sandwell and West Birmingham Hospitals NHS Trust

"The dynamics and engagement of the learning team and participants in the Second Nature Live Learning Programme has been key to deepen my own knowledge and perception of sustainable development. I'm interested in building the business case of sustainable design and the challenge of a hospital's live project could not be more appropriate. We're all getting outside our comfort zone which makes this programme so successful in my view so far."

Gabriela Costa  
Senior Sustainability Consultant (Architectural), SWECO
