

Learn. Do. Transform.

UKGBC 2021/22 learning & leadership activities

Despite the challenges that 2020 brought, it was clear that there is an ever growing focus on sustainability and the desire to learn. For 2021, we have a fantastic range of offerings for members to tap into.

These courses and programmes are designed to engage businesses and employees at all levels, to raise our understanding of how to deliver a more sustainable built environment. From bite-sized learning accessible on the move, to deep immersive training on live projects, you can find the right learning for you or your staff.

In 2021 there is a greater focus on experiential learning through our new outdoor learning **Reflect and Rebuild** programme and best practice sharing, through our **Around the World in 80 Case Studies** and the **Global Green Building Programme**, as well as a range of **'how to' masterclasses** on key topics. **Second Nature Live** will run again focussed on the hospitality sector, which we are much looking forward to welcoming multi-disciplinary delegates on.

Look out for applications opening shortly for the mid to senior level **Change Accelerator** Leadership programme for the Autumn, and plan your nominations for a place on the 2022 highly sought after **Future Leaders** cohort.

Schedule of events

The UKGBC L&D programme is both diverse and comprehensive – delivered across four levels of learning and includes a wide variety of content and delivery mechanisms. We have a schedule of year-round learning prepared so you can plan your year ahead.

Level 1: Raising Awareness

Level 2: Building Knowledge

Level 3: Developing Expertise
