WHAT?

What does the future of the workplace look like in a post-Covid world? With home working now an increasing trend, it's never been more important to maximise the health and happiness of employees in the office to make their commutes, and time in the workplace, really count.

At the **Plantnership**, we're here to help employers achieve exactly that. Our bespoke workplace consultation service can help you revitalise your office spaces with nature and biodiversity, connecting employees to nature, wherever they log-on!

By partnering with our environmentally conscious and sustainable sellers, we bring you a selection of nature-based solutions. Or why not offer your employees a personalised desk service to watch them redesign their own working environment and ... flourish!

Happy workplace = happy employees = the perfect **Plantnership**

HOW?

The **Plantnership** enables nature and workplace integration. Firms are slowly encouraging employees to return to the office in a measured and socially-distanced way, to 'get back to normal' and garner the benefits of collaboration and in-person teamwork. This return is proving challenging – the home office works. It has its 'home comforts' and potentially some outside space to give workers a break into nature, whilst the office requires a uncomfortable commute and is often sterile with rows of empty desks.

The **Plantnership** is a bespoke service that offers corporates and individuals the option to customise and improve the office environment or desk with greenery. Our consultants understand the benefits nature and greenery can have on mood, productivity, collaboration and health. They can help employees choose the most suitable options based on nurturing capabilities, preferences, space and budget.

The **Plantnership** operates via a wholesale model by linking up corporates, employees and suppliers together – enabling cost savings and variety due to economies of scale.

We take on all the admin, the marketing and customer enquiries – if needed, we can also provide after care guidance, educational seminars and other nature-related workshops. We are the perfect **Plantnership**.
